LXME Controller Upgrade

Wi-Fi

Upgrade any LXME Controller to LXME2 *in Seconds* to Gain WiFi Connectivity & More!

NEW FEATURES

- ✓ 40 programs (increased from 4)
- ✓ New, larger and backlit panel
- ✓ Illuminated push buttons and simplified dial layout
- ✓ Standardized design consistent with other Rain Bird controllers
- ✓ Compatible with LNK2 WiFi Module for remote access via the Rain Bird App
- ✓ Simple ET weather functionality

GREAT BENEFITS

- ✓ More freedom and space to plan irrigation schedules
- ✓ Easier to read in bright sunlight or dark environments
- ✓ Simpler, more intuitive operation
- ✓ Schedule start times, set rain delays, and manually start individual stations or programs—right from your smartphone
- ✓ Conserve resources with automatic response to weather conditions

Upgrade Today...No Tools Required!

Making the swap is easy and can be done by a contractor or end user. Simply pop off the front panel of any LXME controller and snap on the new LXME2 front panel.

Compatibility Details

Expansion Block: Only compatible with 12-station expansion cartridges. 8-station cartridges must be changed at the time of upgrade

Flow Sensors: If you are using a Flow Sensor you will need to change the base module
