

ANTELCO 71557 VALVE BOX WITH 3/4" STEEL BALL VALVE & HINGED LID

The Antelco valve box with hinged lid and valve has new features added!

- The box is now Oval shaped to firmly fix into the ground.
- The hinged lid now has a secondary hinged flap and a groove in the box to allow a hose to sit neatly when the lid is closed.
- There are also now drain holes in the base of the box to keep it clean. (We suggest that you install the box on a gravel base to allow easy drainage of water.)
- The lid has added reinforcing to strengthen it.
