

- 01 **Accurate:** Crisp edges and large water droplets ensure proper coverage
- 02 **Versatile:** Adjust to any angle from 0° to 360°
- 03 **Easy:** Colour coded for quick identification and simple inventory

## PRO ADJUSTABLE NOZZLES

### *The All-In-One Choice for Optimal Coverage*

Whether dealing with hillside topography, a curved flowerbed, or other special landscape installations, challenging angles demand nozzles that adjust to their surroundings. Hunter Pro Adjustable Nozzles cover any angle needed on any landscape with the accuracy of a fixed nozzle. Engineered to emit larger than average water droplets, these nozzles are reliable, accurate, and fully adjustable to any angle from 0° to 360°. Pro Adjustable Nozzles are available in seven models that cover distances from 1.2 m to 5.2 m using recommended pressure. For easy inventory and field ID, models are colour-coded based on throw distance.

# PRO ADJUSTABLE NOZZLES

## FEATURES & SPECIFICATIONS

### Features

- Crisp, well-defined edges
- Matched precipitation rate on each nozzle from 8A to 17A
- Easy-grip top for simple adjustment
- Large water droplets cut through wind
- Even distribution results in better coverage
- 1.2 m and 1.8 m radius options provide additional flexibility
- Colour-coded for easy field identification
- Adjustable from 0° to 360°

### Specifications

- Recommended operating pressure: 2.1 bar and 210 kPa

## PAIR WITH PRS30 FOR BUILT-IN PRESSURE REGULATION AND WATER SAVINGS

For water conservation, specify the Pro-Spray® PRS30 pop-up for accurate pressure regulation of 2.1 bar; 210 kPa. Pressure regulation provides the optimal pressure to create large water droplets that resist misting.

### Models

#### PRO ADJUSTABLE NOZZLES

**4A Nozzle**  
Radius: 1.2 m

**6A Nozzle**  
Radius: 1.8 m

**8A Nozzle**  
Radius: 2.4 m

**10A Nozzle**  
Radius: 3.0 m

**12A Nozzle**  
Radius: 3.7 m

**15A Nozzle**  
Radius: 4.6 m

**17A Nozzle**  
Radius: 5.2 m
